Product Specification Sheet

Bluetooth thumbpad for Smartphones, PDAs and Pocket PCs

Part #: ACB31UK

Product Description:

The Targus Bluetooth Mobile ThumbPad is the perfect companion for mobile workers with Bluetooth enabled Smart phones or PDAs. Most Smart phones & PDAs contain a very small or virtual keypad that makes it difficult to type anything longer than a one line message. The Mobile ThumbPad provides a standard 39 key QWERTY interface for easy data entry and complete control. Simply lay your mobile device on a desk or cradle while you type, or alternatively you can attach the ThumbPad to the bottom of your compatible device via the unique clamp provided. Based on Wireless Bluetooth technology, the ThumbPad connects to most Bluetooth enabled smart phones and PDAs with ease, while the backlight option makes productive working at night feasible. When its time to have fun, the ThumbPad also includes a game pad for easier control and participation in your favourite game.

Product Features and Specifications:

- Wireless connection: Easily connect to Bluetooth enabled Smartphones, PDAs and Pocket PCs
- Convenient data input and control: Wireless, external keypad makes it easy to type e-mails or play games
- Practical: Features 4-way game pad control, easy-to-use keys, and a backlit keypad for night use
